

LUKE MACROBERTS

## BIO

Luke MacRoberts is a guitarist/singer/composer from Chicago IL, currently living in Mexico City. He has played with several local Chicago bands such as The Drastics, and JC Brooks and the Uptown Sound and has been a lifelong songwriter. After a year of recording, his full-length debut album *Down The Hole* was released. Much of the original sound to his songs stem from a love for folk music and prog, which can be heard through profound yet honest lyrics which juxtapose over odd time signatures and often dissonant harmony. The music in itself may fight to find continuity, drastically changing between styles more often than not, but the unapologetic authenticity of the lyrics bridge the gap, creating a sound all its own.
